

## Cloud-Based Video Storage For the Ultimate in Cost-Effective Backup.

### OVERVIEW

Enterprises nationwide trust their business electronic security to the leading expertise of NAVCO. Now rely on NAVCO's latest service innovation VideoMetriXs to secure your most critical video streams. For only 50¢ per day per camera.

A cloud-based video storage solution, VideoMetriXs offers the ideal complement to your onsite video surveillance and storage system with:

- Affordable insurance and disaster recovery for your most important video intelligence in the event something goes wrong at your site.
- Long-term storage of high-res video for up to 180 days — versus 7-14 days for footage stored on your onsite DVR.
- Quick access to your most important video triggered by an event, saving you countless hours of reviewing.
- System-generated email alerts to reduce theft and loss with no additional equipment to buy.
- The ability to measure efficiencies and compliance issues for better business management.

### DESIGNING YOUR SERVICE IS EASY

1. Select 1 to 2 of your most important camera views.
2. Select your analytics.
3. Select your live and recorded resolutions and retention preferences.
4. View your post-event video anytime, anywhere.

### FEATURES & BENEFITS

#### Excellent-quality high-resolution video.

**NAVCO expertise and installation** — Access to NAVCO's industry-leading expertise and technology partners. As your needs grow, NAVCO will help.

**Low-cost, long-term backup video storage** up to 180 days.

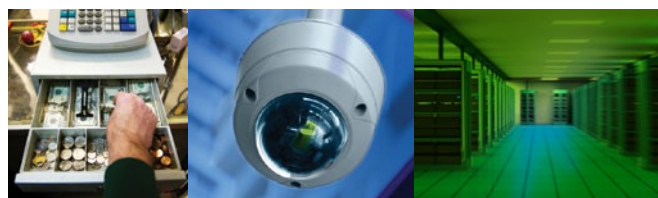

**24/7 access** to video your streams using a laptop, Smartphone, tablet or other mobile device.

**Online and streamlined** — Captured video data is transmitted over the Internet for storage and backup. No clunky tapes or hard drives.

**Built-in intelligence** — Integrated software lets you access and control your cameras remotely.

**Storage for event-triggered video only**, so you can quickly find exactly the images you need.

**Reliability and security** — Captured security images are stored offsite in NAVCO's ultra-reliable, ultra-secure data centers.
