

An Integrated and Streamlined Security Solution

Businesses that succeed today demand all of their systems working in sync simultaneously. Greater work gets done when departments, systems and assets collaborate and contribute their unique strengths to greater organizational goals. NAVCO unifies the electronic security systems across your entire enterprise to give you standardized system management that's easier to use. You get remote access to your information and security systems from anywhere in your network, giving you a clear picture of your organization while saving you lost travel time and costs in the process.

Experience the NAVCO Difference

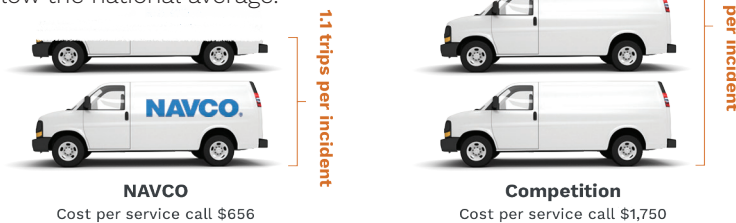

- Secure your property and perimeter with high resolution video
- Monitor multiple sites with a scalable system that grows with your organization
- Simple access control at your fingertips for doors and entry points
- Protect employees and customers while guarding against theft
- Manage vendor and supplier access
- Watch for premise intrusion—both during and after business hours (CCTV coverage)
- Burglary surveillance from external and internal sources

“For the past 16 years, NAVCO has been consistently meeting our security goals on time and under budget. We appreciate you going the extra mile to continue to provide us with quality tools to help us protect our employees and manage our business.”

— Security Systems Manager
Leading Global Logistics Chain

Expert Service

Your property, employees and your customers are safer because our T2R (trips-to-resolution) are so far below the national average.
