

Unique Threats, Unique Solutions

In the restaurant industry, protecting your bottom line means staying on top of inventory shrink, theft and fraud. NAVCO delivers the latest electronic security technologies that equip you with wider coverage and provide quick access to high quality, detailed video images captured across any number of restaurants or venues. We understand your unique electronic security challenges. We work closely with management teams and franchises to identify, implement and integrate the best combination of security technology and services that meet your immediate requirements, while also anticipating future needs and keeping your restaurants, employees and customers safe and secured.

Experience the NAVCO Difference

- Secure your property and perimeter with high resolution video coverage
- Easily share video and manage different users
- Watch for—and verify—slips and trips
- View multiple locations on one screen
- Cloud storage ensures your video footage is safe
- Food safety and awareness/tampering
- Integrate curbside pick-up/to-go notification solutions

“NAVCO offers a personal touch that other larger vendors were unable to provide. NAVCO has the infrastructure that’s big enough to meet our needs, yet small enough to not forget that it is about relationships. NAVCO is a tremendous partner to our business.”

— Director of Security,
Ruby Tuesday

Expert Service

Your property, employees and your customers are safer because our T2R (trips-to-resolution) are so far below the national average.

The NAVCO Difference: Driven by Your Business Strategy and Objectives

We are your trusted security advisor working to maximize ROI and protect your company as you grow.

The Seven Step NAVCO Process

1 | Assess Needs

Our team of knowledgeable electronic security system integrators listen to your specific challenges and goals before making a single recommendation.

2 | Plan Strategy

We work with your senior management team to analyze and evaluate your current assets, develop a cost-benefit analysis and identify budget parameters.

3 | Develop a Vision

We help you develop a long-term security system vision that's aligned with your business goals. Then we build a cost-effective, practical plan to get there.

4 | Prepare for the Future

Our recommendations maximize existing technology investments and integrate next-generation solutions that add value and scale to accommodate future growth.

5 | Design, Manage & Implement

We design custom solutions for each client, and manage every phase of implementation, to ensure projects are completed on time and on budget.

6 | Train Security Personnel

We train your security people to operate your new security system with speed, efficiency and confidence.

7 | Provide Ongoing Support

We can ensure the optimal performance and uptime of your security system by providing convenient remote monitoring, diagnostics and analytics reporting. Also, easily manage your service calls, installation schedule and how we are performing with our customer portal.

National Presence

As one of the largest privately-held national electronic security system integrators in North America, NAVCO operates from a nationwide network of locations strategically close to major business centers. This allows us to respond quickly and nimbly to our clients' requests, whether on a local, regional or national scale.

Reputation & Expertise

For over 50 years, NAVCO has built a reputation as a business security specialist among a growing list of market leaders. Our clients have come to rely on NAVCO as a trusted, expert partner for electronic security solutions that support business goals and adapt easily to meet evolving business needs. Our clients appreciate the fact that we stand behind our solutions, lowering total cost of ownership and anticipating their future technology needs.
