

A Stronger Shield for Financial Institutions

Banking is moving faster than ever, accelerated by a more connected and complicated world. We'll design and support your electronic security system, all backed by NAVCO's expertise and service. Aligned with today's leading security technology innovators, we bring together the latest business security solutions to meet your current and future needs.

Experience the NAVCO Difference

- Reduce and rebuff hacking attempts with secure equipment installed on-site
- Meet and surpass Federal compliance procedures of required policies and regulations
- Secure multiple sites with a scalable system that grows with your organization
- Verify system is working 24/7 with constant camera and system monitoring
- Deter robberies, burglaries and larcenies
- Protect employees and customers with high-resolution video
- Secure your ATMs with both video and member access systems
- Decrease time to investigate fraud

“I am so pleased with NAVCO and all the systems they have installed over the last three years. The systems we put in place and the support I received has tremendously reduced my stress and helped simplify logistics. It has shown the bank's executives how important and effective having the right security systems in place can be to the bank's continuity of business plan. I will be forever grateful to NAVCO.”

— Bank CFE, CPP and Director of Security

Expert Service

Your property, employees and your customers are safer because our T2R (trips-to-resolution) are so far below the national average.

Serving the nation's most respected brands for 50 years.

The NAVCO Difference: Driven by Your Business Strategy and Objectives

We are your trusted security advisor, working to maximize ROI and protect your company as you grow.

The Seven-Step NAVCO Process

1 | Assess Needs

Our team of knowledgeable electronic security system integrators listen to your specific challenges and goals before making a single recommendation.

2 | Plan Strategy

We work with your senior management team to analyze and evaluate your current assets, develop a cost-benefit analysis and identify budget parameters.

3 | Develop a Vision

We help you develop a long-term security system vision that's aligned with your business goals. Then we build a cost-effective, practical plan to get there.

4 | Prepare for the Future

Our recommendations maximize existing technology investments and integrate next-generation solutions that add value and scale to accommodate future growth.

5 | Design, Manage & Implement

We design custom solutions for each client and manage every phase of implementation to ensure projects are completed on time and on budget.

6 | Train Security Personnel

We train your security people to operate your new security system with speed, efficiency and confidence.

7 | Provide Ongoing Support

We can ensure the optimal performance and uptime of your security system by providing convenient remote monitoring, diagnostics and analytics reporting. Also, easily manage your service calls, installation schedule and how we are performing with our customer portal.

National Presence

As one of the largest privately held national electronic security system integrators in North America, NAVCO operates from a nationwide network of locations strategically close to major business centers. This allows us to respond quickly and nimbly to our clients' requests, whether on a local, regional or national scale.

Reputation & Expertise

For nearly 50 years, NAVCO has built a reputation as a business security specialist among a growing list of market leaders. Our clients have come to rely on NAVCO as a trusted, expert partner for electronic security solutions that support business goals and adapt easily to meet evolving business needs. Our clients appreciate the fact that we stand behind our solutions, lowering total cost of ownership and anticipating their future technology needs.
