

Secure Inventory, People and Profits

NORCO partners with national grocery store chains to help simplify, unify and modernize their electronic security systems to protect their employees, customers and profits.

Outdated security technology cannot meet the complex security needs of multi-location grocery stores that are faced with ever-changing security threats. Running profitable grocery stores requires leaders to proactively fight shoplifting, internal theft, vendor shorting and fraudulent injury claims.

Experience the NAVCO Difference

- Centralize loss prevention with remote and mobile viewing
- Secure multiple sites with a scalable system that grows with your organization
- Watch for—and verify—slips and trips
- View multiple locations on one screen
- Cloud storage ensures your video footage is safe
- Improve store quality with remote inspections
- Simple user management for adding and removing employee access

Expert Service

Your property, employees and your customers are safer because our T2R (trips-to-resolution) are so far below the national average.

Serving the nation's most respected brands for 50 years.

The NAVCO Difference: Driven by Your Business Strategy and Objectives

We are your trusted security advisor, working to maximize ROI and protect your company as you grow.

The Seven-Step NAVCO Process

1 | Assess Needs

Our team of knowledgeable electronic security system integrators listen to your specific challenges and goals before making a single recommendation.

2 | Plan Strategy

We work with your senior management team to analyze and evaluate your current assets, develop a cost-benefit analysis and identify budget parameters.

3 | Develop a Vision

We help you develop a long-term security system vision that's aligned with your business goals. Then we build a cost-effective, practical plan to get there.

4 | Prepare for the Future

Our recommendations maximize existing technology investments and integrate next-generation solutions that add value and scale to accommodate future growth.

5 | Design, Manage & Implement

We design custom solutions for each client and manage every phase of implementation to ensure projects are completed on time and on budget.

6 | Train Security Personnel

We train your security people to operate your new security system with speed, efficiency and confidence.

7 | Provide Ongoing Support

We can ensure the optimal performance and uptime of your security system by providing convenient remote monitoring, diagnostics and analytics reporting. Also, easily manage your service calls, installation schedule and how we are performing with our customer portal.

National Presence

As one of the largest privately held national electronic security system integrators in North America, NAVCO operates from a nationwide network of locations strategically close to major business centers. This allows us to respond quickly and nimbly to our clients' requests, whether on a local, regional or national scale.

Reputation & Expertise

For nearly 50 years, NAVCO has built a reputation as a business security specialist among a growing list of market leaders. Our clients have come to rely on NAVCO as a trusted, expert partner for electronic security solutions that support business goals and adapt easily to meet evolving business needs. Our clients appreciate the fact that we stand behind our solutions, lowering total cost of ownership and anticipating their future technology needs.
